

## Special Issue

# Inequities and Interventions in Children's Health and Wellbeing

### Message from the Guest Editors

Children from disadvantaged circumstances are more likely to experience physical and mental health issues than their more advantaged peers. Examples of these issues are low birthweight, obesity, infectious diseases, and anxiety. Disadvantaged children are also more likely to have adverse childhood experiences, such as child abuse and neglect, childhood poverty, exposure to violence at home and in the community, which comprises their well-being (e.g., health and mental health, behavioral health, educational achievement). Socioeconomic disadvantages are the root causes of these inequalities. Interventions need to disrupt pathways to create more equitable health and wellbeing trajectories. This Special Issue is interested in manuscripts that address a wide range of issues and topics related to: (1) inequalities in children's health and well-being and/or (2) innovative thinking and intervention to reduce such inequalities. Qualitative, quantitative, mixed methods, and review papers are welcome

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
