

Special Issue

Influence of Risk Factors on Periodontitis and Periodontal Treatment

Message from the Guest Editors

On behalf of *IJERPH*, we are organizing a Special Issue focusing on risk and influencing factors associated with periodontitis and periodontal treatment. Periodontitis is a highly prevalent inflammatory disease affecting more than 50% of the population worldwide. Diagnosis and management of periodontitis are challenging as several risk factors have already been identified, such as smoking, diet, and systemic diseases (diabetes, chronic inflammatory diseases). However, the profile of at-risk patient needs to be clearly determined through consideration of new potential risk factors. Studies involving the following topics are welcome for this Special issue in *IJERPH*:

- Assessment of risk factors on periodontitis incidence;
- Evaluation of risk factors on periodontal treatment outcomes;
- Biomarkers associated to periodontitis diagnosis and prognosis;
- Development of prognosis assessment tools.

Guest Editors

Prof. Dr. Olivier Huck

Dr. H      Rang  

Dr. Ulk   Baser

Dr. Alexandra St  hli

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
