Innovations in Children's Diet-Related Behaviors

Message from the Guest Editors

"You are what you eat." We are sure each of you heard this as you were growing up and may even have passed it along to your children or young relatives. Although this adage has been around for a long time, it recognizes the critical role that diet has on health. As a health professional, you are well aware that healthy dietary intake during childhood is associated with current and future health, growth and development, and disease prevention.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
