

## Special Issue

# Mental Health, Social and Cultural Welfare in the Post COVID-19 Era: Challenges, Opportunities, and Paradigm Shift

### Message from the Guest Editors

The tragic COVID-19 syndemic is destined to profoundly change health systems globally. Additionally, in mental health, the value of territorial and proximity public health, capable of multidisciplinary interventions centered on the concept of “budget of health”, recovery, and supported housing as overcoming long-term care structures, has further emerged. Growing demands for mental health, urgent social protection, and better public health systems have posed critical challenges in both economic and service delivery capacities. This Special Issue aims to collect papers capable of accurately analysing the current situation and offering useful tools to policy makers to imagine and redesign the future of health policies in terms of mental health, cultural, and social welfare. We welcome studies, reviews, or further articles on all aspects related to topic.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
