

Special Issue

Advances in Financing, Quality, and Effectiveness of Mental Health Systems

Message from the Guest Editors

For this Special Issue, we wish to publish a collection of studies aimed at the improvement of mental health systems. This includes research dedicated to the development of standardized tools for the comparison of resources, mapping, identifying barriers, and increasing the effectiveness and quality of mental health provision systems at local, regional, and national levels, all with the objective of guiding financing policies of mental health systems and ensuring they are better integrated in general health systems. Objectives:

- Develop standardized measurement tools to
- evaluate mental health services
- analyze mental health care quality, effectiveness, and efficiency
- analyze mental health care distribution and organization
- Compare mental health systems (financing, policies, care provision)
- Propose improvements in the quality of mental health services
- Propose improvements in the efficiency of mental health services

Guest Editors

Dr. Juan Luis González-Caballero
Dr. Cristina Romero López-Alberca
Dr. Mencia Ruiz Gutiérrez-Colosía
Dr. Carolina Lagares-Franco

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
