

Special Issue

Qualitative Inquiry in Mental Health Research with Young People

Message from the Guest Editors

We are pleased to announce the Special Issue entitled “Qualitative Inquiry in Mental Health Research with Young People”. Qualitative research provides a voice for research participants to offer authentic experiential evidence that can be used to inform and influence policy and mental health service provision from an evidence-based perspective. Qualitative inquiry provides richly textured, thick description, or deep understanding to supplement the breadth of understanding afforded by quantitative methods, elicit the perspectives and lived experience of research participants, explore issues that have not been well studied, develop conceptual theories or test hypotheses, or examine a phenomenon or intervention. We are looking forward to receiving your excellent work.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
