

Special Issue

Women's Mental and Emotional Health: The Role of Social, Community and Relations' Stressors

Message from the Guest Editors

For this Special Issue, we welcome studies on the impact of relational and social stressors on the emotional and mental health of women and the psychological, physical, and social consequences of, and potential growth and resilience due to, suffering interpersonal or social violence. Topics of interest to this Special Issue include, but are not limited to, gender violence, political violence, sexual exploitation and trafficking, sexual aggression, immigration, and economic deprivation and disadvantage. We welcome public health studies that address the situations that lead to enhancing or reducing the mental and emotional distress suffered by women. We encourage studies that employ cross-sectional, longitudinal, cross-culture, and mixed-model methods.

Guest Editors

Dr. José Luis González-Castro

Dr. Silvia Ubillos-Landa

Dr. Alicia Puente-Martínez

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
