

Special Issue

Advances in Metal Exposure and Lung Diseases

Message from the Guest Editors

This Special Issue of *International Journal of Environmental Research and Public Health (IJERPH)* focuses on the recent advances on the relationship between metal exposure and lung diseases. Research papers on metal single or multiple exposure and risk assessment, determination of new biomarkers of exposure and effects, mechanisms of metal pneumotoxicity, also in the nano form, are welcome to this issue. Furthermore, general and systematic reviews, epidemiological studies, case reports and conference papers about the same topics are also welcome.

Guest Editors

Prof. Dr. Matteo Goldoni

Prof. Dr. Massimo Corradi

Dr. Sara Tagliaferri

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
