# **Special Issue**

# Movement Studies for Individuals with Visual Impairments

# Message from the Guest Editors

Difficulties with movement skills relates with negative self-perceptions and poor self-concept for which individuals with visual impairments are highly susceptible. Specifically, more research is needed to better understand the role of movement competence (in all ages), as an underlying mechanism driving positive developmental trajectories for health, and decisions surrounding adopting a physically active or a sedentary lifestyle. However, to understand the efficacy of intervention and also create a better knowledge of underlying mechanisms supporting positive developmental trajectories for health, psychometrically stout assessments (across all variables of interest) are needed which are specifically designed for individuals with visual impairments across all ages. Papers addressing these topics are invited for this Special Issue. Here are some examples but authors are not limited to these choices:

Predictors of physical activity or sedentary behaviors including but not limited to movement skill, psychosocial, and environmental factors

# **About the Journal**

# Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Centre for Public Health, Equity and Human Flourishing, Torrens University Australia, Adelaide 5000, Australia

## **Author Benefits**

# **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.
