

Special Issue

Holistic Interventions and the Prevention of Musculoskeletal Disorders

Message from the Guest Editors

This Special Issue welcomes original contributions:

Taking a human-centered perspective on sociotechnical systems;

Focusing on interventions in occupational health and safety;

Reporting on the design of products and equipment and organizational actions to prevent musculoskeletal disorders, as well as other related contributions. Forward-looking contributions encompassing future work, whether in office settings, smart logistics, or Industry 4.0 and 5.0 will be considered for publication in this Special Issue. Contributions departing from a human-centered management stance for the continuous ergonomics and human factors improvement of the work environment and industrial engineering interventions with a focus on social sustainability in particular are also welcome. The interplay between the psychosocial environment and the onset and prevention of musculoskeletal disorders, including in occupational as well as remote work-from-home settings are examples of foci encouraged in submissions to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
