Non-Emergent Care in Emergency Departments

Message from the Guest Editors

In addition to their mission of providing care, hospitals, and particularly Emergency Departments (ED), play a public health role. EDs often manage social problems, including poverty and social instability. Hospitals and their EDs are refuges for insecure local populations and migrants arriving in a given country. Emergency physicians are also led to manage consultations for administrative and legal reasons. Thus, non-emergent ED utilization and non-emergency care can represent up to 50% of the activity of an ED. This non-urgent care obviously impacts ED and hospital non-scheduled activities.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
