

## Topical Collection

# Obstetrics–Gynecology and Women’s Healthcare in COVID-19 Times

### Message from the Collection Editors

The novel coronavirus disease (COVID-19) is a global public health emergency. There are many concerns relating to the impact of SARS-CoV-2 infection on pregnant women and their fetuses, as well as the challenge of gynecological patient management in the context of COVID-19. Moreover, preventive health in the OB/GYN patient population is key, and practitioners should become comfortable with providing education about topics as diverse as sexuality, eating disorders, and dating violence, especially in post-pandemic times. This Topical Collection seeks the latest research, guidance and opinions on COVID-19 in obstetric and gynecological settings, including management of infected pregnant women, rationalization of ultrasound services and risk mitigation for both patients and practitioners during the current pandemic. We also welcome high-quality systematic reviews related to these matters.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
