

## Special Issue

# Occupational Ergonomics, Human Factors and Safety: Theory, Application, and Practice

### Message from the Guest Editors

To exchange information and ideas about occupational ergonomics and safety, articles may deal with a variety of research areas, such as risk assessment, workplace safety and health, safety culture/climate, work performance, an aging workforce, organizational/systems safety, human–systems interface, physical and virtual work environments, and workers' well-being and wellness. Submissions on newly emerging/contemporary research areas and research on practices in regard to physical and cognitive ergonomics and safety, ergonomic risk factors assessment and controls/management, in different occupational settings and/or industry-specific occupational ergonomics and safety issues, etc. are also welcome. This Special Issue is open to a number of subject areas related to occupational ergonomics, human factors, and safety and health. The listed keywords suggest just a few of the many possibilities. Please consult the editors for further information.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
