## Occupational Cancer: From Early Detection to Prevention

### Message from the Guest Editors

Work contributes significantly to the burden of cancer. Because of the latent nature, it remains difficult to determine the occupational causes and clinically diagnose work-related cancers. Consequently, it often takes decades between the introduction of a substance in the market, the reporting of the first suspected cases, research findings, and finally legal restriction or banning. In this Special Issue, we welcome original and review papers on the relationship between occupational exposures and cancer. We aim to close the gap between early detection and prevention through publications on - the identification of occupational hazards, - the diagnosis and reporting of (clusters of) clinical cases, - the assessment of occupational exposure to carcinogens - epidemiological studies, including the determination of the burden of work-related cancer - impact studies on the prevention of work-related cancers

### Guest Editors

**Prof. Dr. Lode Godderis**
1. Centre for Environment and Health, University of Leuven, 3000 Leuven, Belgium
2. IDEWE, External Service for Prevention and Protection at Work, Heverlee, Belgium

**Dr. Jukka Takala**
International Commission of Occupational Health, 00078 Rome, Italy

### Deadline for manuscript submissions

closed (31 October 2019)

# About the Journal

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

## Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA

## Author Benefits

**Open Access:**
free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:**
indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:**
CiteScore - Q1 (Public Health, Environmental and Occupational Health)
