

## Special Issue

# Occupational Ergonomics: Design, Development, and Usability Evaluation of Ergonomic Products for Application in Various Industries

### Message from the Guest Editors

It is our pleasure to announce the launch of a new Special Issue on “Occupational Ergonomics: Design, Development, and Usability Evaluation of Ergonomic Products for Application in Various Industries” in the *IJERPH*. As many researchers recognize, work-related musculoskeletal disorders (WMSDs) have become a significant issue due to increased social overall interests in the safety and health of working places at various industrial sites and changes in working consciousness. The research scope in this Special Issue is the study of the development and usability of “wearable robots”, “medical appliances”, and “rehabilitation aids” that have recently been actively researched around the world to prevent musculoskeletal diseases in industrial sites. We would like to say that we are not limited to the keywords listed in the scope of this Special Issue but are fully open to various research topics related to occupational ergonomics, safety, and health.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
