

Special Issue

Occupational Stress and Health: Psychological Burden and Burnout

Message from the Guest Editors

A growing body of empirical evidence shows that occupational health is now more relevant than ever due to the COVID-19 pandemic. Occupational stress in health-care workers has attracted the attention of many researchers. In addition, other professionals have also experienced major changes in the workplace (e.g., teleworking). This Special Issue aims to provide a comprehensive approach to occupational health from a broad range of perspectives. For instance, leadership is a relevant variable to consider as employees' perception about their superiors' particular leadership style is related to their well-being at work. Other recommended topics may include (but are not limited to) the following:

- Work and organizational psychology;
- Occupational health (with a focus on promotion);
- Psychosocial risk factors at work settings (with a focus on prevention);
- Work-related stress;
- Burnout and related variables (e.g., exhaustion, detachment from the job, professional self-efficacy);
- Employees wellbeing and key indicators (e.g., work engagement);
- Absenteeism, presenteeism, and work addiction;
- How to create and promote healthy organizations.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
