

Special Issue

Frontiers of Occupational Psychology: Substantive and Methodological Issues

Message from the Guest Editors

In a globalized society that is constantly changing, the study of human behavior at the workplace has seen important innovations from a theoretical, methodological, and practical perspective.

The goal of this Special Issue is to explore recent developments in occupational psychology, with important implications for research and for personal and professional lives both now and in the near future. In this regard, article proposals do not have to be directly related to classic topics in occupational psychology such as job analysis, personnel recruitment and selection, bullying, workplace aggression or violence, motivation, stress, satisfaction, productivity, training, leadership, or individual or group behavior. Instead, the articles must clearly contribute to the general idea of improving the “worker experience” from either a theoretical and methodological perspective, or an applied, empirical point of view.

Guest Editors

Prof. Dr. Salvador Chacón-Moscoso
Dr. Francisco Pablo Holgado-Tello
Dr. Susana Sanduverte-Chaves

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
