

Special Issue

Video Games and Well-Being in Older People

Message from the Guest Editors

In this special issue, we are interested in socio-affective dimension. This involves analysing the extent to which the use of different types of digital games, is related to the emotional and social well-being of older adults. To this end, we are interested in papers emphasising, but not limited to, the following areas:

- The role of social and educational video games in the functional improvement, autonomy and general well-being of the elderly
- The examination of the socioemotional impacts of gaming on older adults
- The presentation of evidence on the effects of digital games on the improvement of social interaction and inclusion of the elderly
- The assessment of the potential of video games on intergenerational relationships and perceptions
- The analysis of evidence on the role of video games, digital games and interactive network games in improving social interaction and active participation, belonging and social engagement of the elderly
- Technological devices based on video games for e-leisure and older adults' entertainment
- The role of serious games in the early diagnosis of cognitive decline and dementia

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
