

Special Issue

Social and Environmental Determinants of Oral Health

Message from the Guest Editor

The oral health status of populations involves a complex network of determination. There is evidence in the scientific literature on the importance of social determinants of health and specifically in oral health. The investigation of environmental factors on oral health needs to further progress. Knowledge of these determinants allows us to propose strategies for overcoming inequalities in oral health. This is one of the challenges of today's world. This special issue will examine studies of social and environmental determinants of oral health.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
