

Special Issue

Oral Health among the Older Population

Message from the Guest Editors

This Special Issue aims to review and document the cardinal issues and state-of-the-art in oral health among the older population—a profoundly impacted and considerably changed scenario today. Selected high-quality contributions that cover different aspects of this scenario will make this issue both interesting and important reading material for several disciplines involved in the health-related circumstances of the older population. Papers can comprise personal research work, quantitative and qualitative methods, or reviews of recent and actual reports of other researchers. Papers targeting more recently developed fields or research directions are especially welcome. Contributions to this Special Issue will be accepted by invitation only in order to benefit both authors and readers; we would also like to grant a discount for submissions based on evaluation.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
