

Topical Collection

Relationships between Oral Health Management and Systemic Health

Message from the Collection Editor

This Special Issue will focus on various aspects of oral health management, such as: (1) oral health management as supportive oncology, (2) perioperative oral health management for the prevention of post-operative complications and improved prognosis of the systemic disease, (3) evidence for mechanisms that may link periodontal diseases and systemic diseases, (4) approaches to oral health management for preventing flails (oral flail) in elderly persons, and (5) the development of devices or assessment tools to improve oral health management.

- oral health management
- professional oral hygiene care
- supportive oncology
- medical and dental collaboration
- oral bacterial infection
- periodontal diseases
- feeding and swallowing rehabilitation
- nutritional management

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
