

Special Issue

Palliative Care for Chronic Diseases

Message from the Guest Editors

This Special Issue will explore palliative care for chronic disease, examining the key issues that arise for patients and their families in receipt of palliative and end-of-life care. Articles for this Special Issue may focus on issues that arise for patients with chronic disease and their families from diverse and varying cultural and ethnic backgrounds, and how these may influence health-related decision making. Through these explorations, this Special Issue will draw attention to, and deepen our understanding of, palliative care for chronic disease.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
