Special Issue

Patient-Centered Care in Sports Medicine Services

Message from the Guest Editor

The Special Issue will be focused on the healthcare core competency of patient-centered care. Specifically, we are seeking submissions on the provision and delivery of patient-centered care in sports medicine, athletic training, physical medicine, physical therapy, and orthopaedics. The articles can be quantitative or qualitative reports. Priority will be placed on articles exploring the extent to which healthcare providers (e.g., physicians, athletic trainers, etc.) provide patient-centered care. The Special Issue will continue to explore and document best practices within sports medicine when delivering patient-centered care for work, life, and sport in the physically active.

Potential topics include, but are not limited to: Shared decision making; Fear and anxiety relief; Goal setting; Guidance and support for support systems; Self-management & care strategies; Health literacy and communication strategies; Social determinants of health & cultural considerations; Access to care; Patient education; Use of disablement models (e.g., Nagi, WHO ICF).

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
