

Special Issue

Pediatric Obesity Treatment and Prevention

Message from the Guest Editor

We are organizing a Special Issue on the relationship of public health and pediatric obesity treatment and prevention in the *International Journal of Environmental Research and Public Health*. The venue is a peer-reviewed scientific journal that publishes articles and communications in the interdisciplinary area of environmental health sciences and public health. For detailed information on the journal, we refer you to <http://www.mdpi.com/journal/ijerph>. Pediatric obesity continues to be amongst the most challenging healthcare issues facing the world. As we recognize that environmental issues are critically important, public and population health-based initiatives are playing a more and more prominent role in fighting the obesity epidemic. With this Special Issue, we hope to explore new and innovative ways the obesity problem is being approached on a community, region, national and worldwide scale. This Special Issue is open to any subject area related to the impacts of public and population health on pediatric obesity.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
