

## Special Issue

# Perinatal Mental Health for Mothers and Their Partners: A Matter for Public Health

### Message from the Guest Editor

This Special Issue aims to discuss new knowledge or new cutting-edge developments in perinatal mental health research (for mothers, fathers and other partners) through selected works, which will provide a great contribution to the community. In addition to adding to the research on maternal mental health, we are keen to include new developments regarding the mental health of fathers and other partners (including same-sex partners), as evidence on these factors remains limited. Given the global events of 2020, we are also keen to encourage contributions that focus on the impact of COVID-19 on perinatal mental health. We feel that the topics raised here have important implications for our global environment and public health. We are looking forward to receiving your excellent work.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
