

Special Issue

Psychology, Behavior and Health Outcomes

Message from the Guest Editors

This Special Issue aims to collect the latest developments in personality, behavior, and health outcome research, including the relationship between different personality traits and behaviors that can affect health, what kind of personality traits are risk factors for adverse health outcomes, and the practice of intervening in personality traits to change individual behavior. Potential topics for submissions include but are not limited to:

- The relationship between personality traits and health-related behaviors;
- The mediating role of behavior between personality and health outcomes;
- Personality traits, behaviors, and health outcomes of special populations (patients with chronic diseases, pregnant women, etc.);
- Personality and behavior differences between patients with chronic diseases and healthy people;
- Practices that change an individual's personality, and then change behavior, thereby affecting health.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
