

## Special Issue

# Personality, Health, and Well-Being among Older Adults

### Message from the Guest Editor

This Special Issue of the International Journal of Environmental Research and Public Health (IJERPH) aims to contribute to our knowledge of the relationship between individual psychological factors (including personality) and the health and well-being of older adults, in addition to elucidating the mechanisms underlying these relationships (e.g., mediation process and moderating effect). The editor of this Special Issue invites you to submit presentations of research regarding personality, health, and well-being among older adults. Original articles, literature reviews, meta-analyses, brief reports, and commentaries are welcomed.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
