

Special Issue

Physical Activity and Occupational Health

Message from the Guest Editors

Environmental factors affecting human health included in the Special Issue come from chemical factors (aviation fuel, radiation), physical factors (overload), biological factors (COVID-19), and diet (nutritional profiles and nutritional status). The influence of genetic factors has also been demonstrated. Publications in this issue should present the origin of these factors, as well as the effects of their occurrence. Moreover, invited to the Special Issue are publications that describe methods, means, and tools to counteract these dangers. These include, among others, physical activity, nutritional supplementation, lifestyle, and learning methods.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
