

Special Issue

Physical Activity and Health in Children

Message from the Guest Editor

The benefits of physical activity for children are well established. These benefits highlight the importance of ensuring that children have access and opportunity to participate in physical activity at home, at school, and in their communities. This Special Issue intends to provide authors with a platform to contribute their research specific to how physical activity is benefitting the health and wellbeing of children and how specific programs and interventions are changing behavior and improving health.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
