

## Special Issue

# Physical Therapy and COVID-19 Sequelae: Future Challenges for Preventing Related-Disability

### Message from the Guest Editors

The COVID-19 virus has spread rapidly across the globe in a very short time with catastrophic consequences. The current Special Issue is focused on the role of physical therapy in COVID-19, a topic of emerging relevance. Millions of people will continue to be infected with and will survive COVID-19 infection; therefore, understanding the potential sequelae and the role of physical therapy in their identification and management should be a priority. We invite researchers/clinicians to submit original articles, systematic reviews, narrative reviews, meta-analyses, case reports, and qualitative studies related to physical therapy and COVID-19 to this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
