

Special Issue

A Developmental Psychopathology Perspective on Political Violence and Youth Adjustment: Recent Advances and Emerging Themes in Research and Intervention

Message from the Guest Editors

This Special Issue aims to include manuscripts reflecting recent advances in longitudinal tests of process-oriented explanatory models for both resilience and adjustment problems as well as new directions for developing more efficacious interventions based on the translational intervention model espoused by the developmental psychopathology perspective. Finally, efforts will be made to include the contributions of promising junior scholars and diverse contexts of political violence and armed conflict.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward
