Positive and Existential Psychology in Times of Change: Towards Complex, Holistic, Systemic and Integrative Perspectives

Message from the Guest Editor

The editor would like to invite research from all disciplines, cultures, and societies to present their research from different EPP perspectives, following complex, systemic, holistic, and integrative approaches to respond to complex times of change. Key questions: How can EPP address the complex changes and challenges of our times in theory, empirical evidence, and practice? What new models in EPP are needed to capture and promote a complex and systemic understanding of the world and life? How can human beings respond to core questions of life to secure a holistic, sustainable world? Which guidance can EPP give to deal with opportunities and challenges with regard to sustainability, holistic living approaches, spirituality? How can we (re-)define meaning of life, meaning making, and identity development for a sustainable future based on EPP? How can EPP contribute not only to human–human relationships, but also to human–nature and human–animal relationships? Keywords: positive psychology; existence; existential positive psychology (EPP); times of change; transforming WEIRD studies; paradigm shift; cultural views; holistic; systemic; complex; integrative

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
