

Special Issue

Risk Assessment and Preventive Child Health Care during the First 1000 Days from Conception Onwards

Message from the Guest Editor

This Special Issue of *IJERPH*, entitled “Risk Assessment and Preventive Child Healthcare during the First 1000 Days from Conception Onward” offers an opportunity to publish high-quality research, reviews, and theoretical notes that further our understanding of the role of primary and secondary prevention of changes originating from the preconception phase and the first 1000 days of life, and which role preventive child healthcare can play. We welcome quantitative, qualitative, and mixed-methods research. We invite you to submit articles on topics including, but not limited to, the following:

- Development of primary and secondary preventive interventions in the preconception phase and the first 1000 days of life leading to a reduction of adverse developmental outcomes and diseases later in life;
- Evaluation of primary and secondary preventive interventions in the preconception phase and the first 1000 days of life leading to a reduction of adverse developmental outcomes and diseases later in life;
- Innovations in risk assessment and care pathways in the preconception phase and the first 1000 days of life

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
