

Special Issue

Psycho-Criminology, Crime, and the Law (2nd Edition)

Message from the Guest Editor

Psychological criminology is regarded as the convergence of psychology and criminology in which psychological criminology is concerned with the use of psychological knowledge to explain or describe, with the attempt to change, criminal behavior. This Special Issue focuses on the application of psycho-criminological approaches and constructs to crime, criminal and civil law, and the influence of law on behavior. This is to explore how individual criminal behavior is acquired, evoked, maintained, and modified through personality, social, and/or environmental influences. Contributors from criminology, criminal justice, psychology, psychiatry, sociology, legal, forensic sciences, genetics, public health, and allied fields are welcome to submit their work. From a public health perspective, the key aim of this Special Issue is to advance our understanding of psycho-criminological mechanisms (i.e., personal, social, and environmental influences) associated with different criminal behavior in the intersections of the law.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
