Special Issue

Research Methods in Psychological Research on Climate Change

Message from the Guest Editors

Humanity is facing an existential threat with climate change, and academics have a lot to contribute in supporting their societies in facing this challenge. Psychologists have been involved in trying to understand the challenges and design interventions aimed at managing and mitigating the impact of climate change. This Special Issue will explore the methodologies that psychologists have employed for these purposes. We invite contributions from psychologists across the globe, employing different methodological approaches to gain insight into these issues. We hope that this Special Issue will provide psychologists with a toolbox that they can refer to when designing research in this area, and non-psychologists with an overview of the contribution our discipline can make to the climate change debate.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers.

Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
