

Special Issue

Psychosocial Impact of Chronic Disease on Patients, Families and Caregivers

Message from the Guest Editor

This Special Issue seeks to address the impact of chronic disease across the lifespan. The goal is to bring together researchers addressing the impact of chronic disease on well-being in order to inform intervention programs to facilitate adaptation, treatment, and quality of life in patients, families and caregivers. The current Special Issue welcomes research papers in the area of clinical health psychology informed by all disciplines including but not limited to psychology, public health sciences, behavioral medicine, epidemiology, family therapy, and nursing, addressing patients, couples, families and caregivers. Reports of interdisciplinary approaches in research including integrated care are particularly welcome.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
