

Special Issue

Emerging Psychosocial Issues in Occupational Disease and Occupational Health

Message from the Guest Editor

Within recent years, a growing body of longitudinal, multi-level and meta-analytic research has highlighted the need for comprehensive and evaluative studies examining the risks to psychosocial health and safety at the organizational and sector levels. This Special Issue of the *IJERPH* invites research papers, reviews, case reports, commentaries and conference papers to help understand the following issues: challenges of globalization and increased competition; impact of Industry 4.0 and technological change; gig economy and temporary online work platforms; increase in workplace digitalization; growth of remote work; role of surveillance; growth of digital communication; intensification of work; increase of service work and associated emotional demands (bullying, violence); intrusion of work into non-work time; conflict between family and work; impact of worker burnout, recovery or engagement; role of organizational culture or cross-cultural impacts; importance of psychosocial safety climate; and the need to design health and well-being promotion policies to address the wide-ranging and diverse occupational changes that are likely to increase in the coming years.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
