Psychosocial Factors and Health at Work: Evaluation and Intervention

Message from the Guest Editors

It is our pleasure to announce the launch of a new Special Issue on psychosocial factors and health at work. With your impressive professional career and the focus of your latest research, we believe you could make an excellent contribution to this Special Issue. We are specifically inviting papers outlining studies and research in the field of psychosocial factors linked to work stress and burnout, as well the evaluation of these and experiences in intervention to prevent them. You are more than welcome to share any questions you may have related to this Special Issue with us. It would also be greatly appreciated if you forward this call for papers to any colleagues specialized in this topic who you believe may also be interested in contributing with a research paper, review, or commentary. For more information, please visit [Special Issue](#).

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
