

Special Issue

The Economics of Public Health in Eastern Europe and Eurasia

Message from the Guest Editor

During the last 50 years, an East–West health divide has evolved within Europe. The failure of the countries of Eastern Europe and Eurasia to substantively improve the health of their populations from the 1960s, the subsequent sharp falls in life expectancy in the 1990s, the divergence in health reforms and outcomes—as they improved—in the 2000s and beyond, all speak to the role played by socio-economic, socio-psychological and socio-cultural circumstances in shaping health reforms, policies, outcomes, and behaviors. This Special Issue will shine a light on the “Economics of Public Health in Eastern Europe and Eurasia”. The ultimate aim of this Special Issue is to promote knowledge of the health economy and public health in Eastern Europe and Eurasia, to make it accessible to the scholarly community, and to facilitate the transfer of knowledge and best practice in the survey, surveillance, health promotion, health policy and health outcomes research between and within Western Europe, Eastern Europe, and Eurasia.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
