

## Special Issue

# Second Edition of the Current Situation and Distribution of Rare Diseases: Challenges, Prevention, Healthcare, and Effects

### Message from the Guest Editors

The aim of this Special Issue is to report on recent news in the field, e.g., methodologies or designs applied to the epidemiology of rare diseases such as qualitative techniques or syndromic surveillance. The evaluation of strategies or plans for rare diseases at country or regional level is also an emerging topic. More publications are needed on ethical, codification issues and data protection aspects. We encourage rare diseases researchers, clinicians, epidemiologists, and patient organizations to join us in this new edition of the Special Issue on rare diseases and their challenges.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
