

Special Issue

Public Health: Rural Health Services Research

Message from the Guest Editor

We are organizing a Special Issue on “Rural Health Services Research” in *International Journal of Environmental Research and Public Health*.

We have seen health inequities and poorer health outcomes experienced by rural and remote communities further exacerbated by the COVID-19 pandemic response and the changes in climate. This Special Issue of IJERPH aims to acknowledge, celebrate, and share the innovations in rural health services and workforce research as we respond, recover, plan and prepare for the future. This Special Issue will explore the many approaches to the design, delivery and evaluation of rural and remote health services, including health workforce training and development; integrated healthcare; telehealth; technological advancements in health; environmental health; education and training; capacity building in rural and remote communities; health policy; universal health coverage; Indigenous or First Nations health; and care provision for disadvantaged, marginalized and vulnerable communities. The Issue is open to any topic related to rural and remote health. The listed keywords below suggest just a few of the many possibilities.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
