

Special Issue

SARS-CoV2 and COVID-19 Outbreak: Lessons, Burning Points and Perspectives

Message from the Guest Editors

As of January 2020, Covid19 has led to actual and figurative infections—the latter acting on an emotional and behavioral level and being mostly nurtured by data and their (mis-)interpretation, further spread by media and social networks. Both types of infections influence one another interactively. The events have revealed the severe impact of data illustration on subjective and collective perceptions, predominantly leading to counterproductive anxiety, mistrust, and stagnation. The Special Issue provides a venue for authors from various disciplines to disseminate crucial information about the SARS-CoV2 virus and the associated outbreak of COVID19. The scope of the issue shall encompass the following:

- Original articles about the SARS-CoV2 (including pathology, virology, biology, transmission, etc.)
- Original articles about the COVID19 (clinical and translational data)
- Viewpoints (impactful reports, commentaries, and letters)
- Perspectives (based on systematic reviews), such as predictions, estimations, comparisons to other viral entities, etc.
- Innovations: drug development, original preventative measures, etc.

Guest Editors

Dr. Evelyne Bischof (prev. Biskup)

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
