

Special Issue

Implementation of Self-Management Interventions in Chronic Disease Care: Challenges and Lessons Learned

Message from the Guest Editors

This Special Issue of the *IJERPH* will be devoted to the implementation of effective and/or cost-effective interventions in order to support the self-management of individuals with chronic conditions. We encourage you to submit original empirical studies, as well as systematic reviews, realist reviews, or meta-analyses. Short reports and methodological papers will also be considered. In particular, we encourage the submission of interdisciplinary work and multi-country collaborative research, as well as manuscripts that address (but are not limited to) the implementation of self-management interventions, applied to the following fields:

- Hard to reach populations
- Multidisciplinary settings
- People suffering from co-morbidity and multi-morbidity
- Descriptions of development, validation, or the evaluation of self-management interventions in health care and the community in which the implementation factors are addressed
- Empirical studies applied to any subject related to self-management interventions in high- and/or low-resource environments.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
