

Special Issue

Sex, Gender, and Health

Message from the Guest Editors

This Special Issue will focus on critical analyses, emerging measures, and illustrative examples of sex and gender as they affect human health in any setting, population or health issue. The Special Issue will feature comprehensive sex- and gender-based analyses and equity-oriented, intersectional, and gender-transformative approaches to better understanding how sex- and gender-related factors influence human health.

We invite submissions for this Special Issue that illustrate the inclusion of sex and/or gender and/or sex-gender interactions in health research, practice, and policy, spanning biomedical research, clinical care, health promotion, health policy, and public health. Papers on any health condition are welcome, including experimental research, clinical trials, epidemiological studies, program development, policy analyses, as well as systematic, scoping, and narrative reviews.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
