

Special Issue

2nd Edition of Social Determinants of Health

Message from the Guest Editors

We invite investigators to contribute original research (empirical and theoretical) and systematic reviews that will further broaden our understanding of the cultural, economic, political, and social factors that contribute to, or may decrease, health disparities. An important aspect of every manuscript selected for inclusion in the Special Issue will be a focus on social determinants of health disparities and/or applications of research findings reducing health disparities. Potential topics include but are not limited to:

- Theoretical models specifying the relationship between social determinants and health disparities;
- Intersectional approaches to advance our understanding of social determinants and health disparities;
- How social determinants operate at the individual, place, and/or community levels to influence health outcomes;
- Epidemiological studies explicitly examining social determinants and their association with health disparities;
- Intervention studies that consider how social determinants of health affect health disparities.

Guest Editors

Dr. Roland J. Thorpe, Jr.

Dr. Paul Archibald

Dr. Marino A. Bruce

Dr. Haley Barge

Deadline for manuscript submissions

closed (31 March 2023)

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
