

## Special Issue

# Health Care and Social Support for the Aging Population

### Message from the Guest Editor

In this Special Issue, interested authors are invited to contribute their research. Both qualitative and quantitative studies are welcome. We encourage authors using innovative approaches to unveil the complicated associations among health care, social supports, and health outcomes, including active aging, mental health, physical health, frailty, geriatric syndrome, and mortality. In particular, works that address cost-effective suggestions for policies are suitable for this Special Issue. Review articles which compare health and welfare policies for psychosocial issues among countries are also welcome.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
