

Special Issue

Spiritual Wellbeing in Palliative Care and Health and Social Care

Message from the Guest Editor

This Special Issue will explore perspectives on spiritual wellbeing from all areas of health and social care, and for all care recipients, including, but not exclusively, people receiving supportive, palliative, and end-of-life care, and people living with life-limiting and/or chronic long-term conditions. I would be pleased to receive submissions across the breadth of health and social care, including articles from a health promotion and public health perspective, and those discussing compassionate communities. I am keen to include papers which reflect theoretically as well as presenting empirical data, and look forward to receiving articles covering a wide variety of fields and approaches, and recognising the socio-cultural specificity and variety shaping spiritual wellbeing.

Guest Editor

Dr. Bella Vivat

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
