

Special Issue

Suicide and Self-Harm Behavior on the Internet

Message from the Guest Editors

Suicide and self-harm present a major global health concern. In recent years, there has been a substantial increase in interest regarding the impact of the Internet on these behaviors, and considerable research efforts have been devoted to understanding and managing suicide and self-harm on the Internet. However, knowledge on how suicidal and self-harming individuals conduct themselves online still remains limited. To that end, we are pleased to invite you to participate in a Special Issue on “Suicide and Self-harm behaviors on the Internet” in the International Journal of Environmental Research and Public Health. This Special Issue aims to include high-quality research and reviews addressing all relevant aspects of this topic, including (but not limited) to phenomenology and epidemiology, theoretical models, assessment, prevention, and intervention of suicide and self-harm on the Internet. Submissions that focus on innovative methodologies and novel data resources are particularly welcome.

Guest Editors

Prof. Dr. Tingshao Zhu

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
