

## Special Issue

# Stigma, Health and Wellbeing

### Message from the Guest Editors

The modern world has made health technologies and medications available that lead to cures for diseases and health enhancement. The life expectancy among populations in different locations of the world has significantly increased; however, psychosocial health remains an important problem in our communities. One of the important issues in psychosocial health is stigma. Stigma may manifest itself in various forms: public stigma, experienced stigma, perceived stigma, and self-stigma. As long as any type of stigma exists, it poses a great threat to the health and well-being of those who are stigmatized. The results will include loss of opportunities in various aspects of life such as the availability of treatment, employment, housing, education. All of these aspects are important components of quality of life. Unfortunately, the link between stigma and health is still not fully understood. Therefore, we need more evidence to help healthcare providers to better understand the issue among populations in different parts of the world.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
