

Special Issue

Suicide Prevention Strategies

Message from the Guest Editor

This Special Issue of the *International Journal of Environmental Research and Public Health*, entitled “Suicide Prevention Strategies”, offers an opportunity to publish high-quality multi-disciplinary research. We welcome research related to suicide and suicide attempt with high intent epidemiology (rates, trends, patterns among countries, gender, age, and occupational group), research on indicators and surveillance initiatives (to account for the constellation of risk factors and the heterogeneity of data quality), and papers related to prevention strategies and interventions.

Guest Editor

Dr. Evangelos C. Alexopoulos
Alexopoulos Evangelos Medical PC, Ellispontou 11, 156 69 Athens,

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
